LUMYVUE – Complete UI Map

Every screen, panel and control of the SkinDevApp WPF interface, labeled and described. Built from the source code (XAML pages and code-built windows); the app was not run to produce it.

0. Overall structure and look

LUMYVUE is one full-screen window. A single Frame swaps pages; each page slides up and fades in (about 0.35 s). The interface scales up to 1.3x on large monitors and adapts to portrait screens.

Always-present layer	What it does
MainFrame	Holds the current page.
DimLayer	Dark overlay behind pop-up dialogs.
ExitLayer	Closing screen with the LUMYVUE wordmark: "Closing LUMYVUE", or "Saving the last scan..." if a save is running.
ToastHost	Small notifications at the bottom right; fade out after about 3.6 s.
On-screen keyboard	Opens when a text box is tapped on a touchscreen. Number, QWERTY and symbol rows, Shift, Enter, "Hide keyboard". Can be forced on in Settings.

- **Fonts:** Constantia (italic headings and the wordmark), Segoe UI (body text).
- **Colors:** sage/olive, blush, peach, cream. Page #F6F3EA, ink text #2F3024, sage gradient headers.
- **Class colors:** Acne red, Hyperpigmentation blue, Eczema amber, Normal green.
- **Signature element:** a six-swatch skin-tone ribbon from light to dark.

1. Splash screen

- Borderless rounded window, 780 x 480. Large italic **LUMYVUE** wordmark, six-color ribbon, tagline "AI skin health monitoring".
- Bottom: spinner, status line, thin progress bar.
- Steps: Initializing system, Connecting camera, Preparing AI models, Checking heat-map service, Loading workspace.
- The bar moves only when a step has really finished (nothing simulated).

2. Login page

Element	Description
Left brand panel	Hidden on portrait/narrow screens. Wordmark, "AI skin health monitoring", headline "Three angles, one clear picture of your skin.", description, ribbon, footer "Research prototype. It is a screening aid, not a diagnosis."
Sign in title	"Sign in" with "Welcome. Please sign in to continue."
Username / Password	Two fields. Enter moves to the next box, then signs in.
Confirm password	Shown on first run only (no account exists yet).
Hint line	Explains first-run setup or account-database errors.
Sign in button	Becomes "Create account and sign in" on first run.
Errors	Wrong password or lockout opens a "LUMYVUE Security" dialog.

3. Standard header bar

Used on every page except the dashboard, which has no Back button.

- **Left:** wordmark and ribbon, then a divider.
- **Middle:** page title with "AI skin health monitoring" below it (subtitle hidden on narrow windows).

- **Right:** user chip, then **Back**, **Dashboard**, **Sign out**. Buttons shrink to icons when narrow.

4. Dashboard / Home

Section	Description
1. Greeting block	Date line, "Good morning/afternoon/evening, user", "Register a patient, run a scan, or open the records." Button **Check system again** at the right.
2. Readiness strip	Four chips with icon, name and Ready / Needs attention (hover for detail): Camera, Skin model, Heat-map service, Database.
3. Current patient box	Appears only when a patient is selected: avatar, "Current patient PS-0001 - Name", "Skin analysis continues with this patient.", **Clear**.
4. Hero buttons	**New registration** (sage): register a patient, create ID, then consent. **Skin analysis** (blush): pick or continue patient, take front/left/right photos.
5. WORKSPACE tiles	Three per row: Patient records; Research dashboard; Waiting for review (live count); Model information; Settings; About LUMYVUE; Old report log.
6. Footer note	"LUMYVUE is a research prototype... does not replace professional medical evaluation."

5. Registration ("Patient registration")

Fields marked * are required. Two columns.

Left column

- **Patient details:** Patient ID (read-only, auto); First / Middle / Last name; Date of birth; Age *; Sex * (Female, Male, Intersex, Prefer not to say); Contact details; Recorded by (staff ID) *. Edit mode only: Record status (Active, Withdrawn, Completed) and "Reason for this change *".
- **Skin profile:** Skin type * (Oily, Dry, Combination, Normal, Sensitive, Not sure); Skin sensitivity (None to Severe); "How long has the concern been present?"

Right column

- **Skin concerns:** checkboxes Acne, Eczema, Hyperpigmentation, None / Normal, Other (+ text box). "Areas of the face affected": Forehead, Left cheek, Right cheek, Nose, Chin, Multiple areas, Other (+ text box).
- **Current skincare and treatments:** Cleanser, Moisturizer, Sunscreen, Acne / Eczema / Pigmentation treatment, Other products, Recent facial procedures or cosmetics, Other notes.

Bottom bar: Cancel, red validation message, Save registration, Continue to consent.

6. Consent

- Notice: "Items marked * are required. Nothing is ticked for you."
- **A. Agreement to take part in the research:** two required checkboxes (read and understood; voluntary).
- **B. Agreement to photograph the face:** two required checkboxes (permission to capture; permission to process) and one optional checkbox for future model improvement.
- **Bottom bar:** Decline; hint "Tick every required item to continue."; **Agree and continue** (disabled until all required boxes are ticked).

7. Preparation ("Get ready to scan")

- **Status banner:** colored dot, title, "0 of 4 checks done", button **Check the camera again**.

Card (2 x 3 grid)	Content
Camera connection	Status dot + text, detail text, camera picker (only if several cameras).
White light	Even front light, no backlight. Button "The lighting looks good".
Distance	About 40-60 cm, chin lined up with the guide. Button "The distance is correct".

Card (2 x 3 grid)	Content
Face position	Remove glasses/mask, hair away from face. Button "The position is ready".
Skin model	Loading / ready status.
Heat-map service	Status and a **Try again** button if down. Scans still work without it, but no heat maps are made.

Bottom: Back and Start scan (disabled until the checks pass).

8. Scan workstation (main screen)

Header: "Skin scan" with a patient/scan info line; buttons Dashboard and Sign out.

A. Camera area (dark rounded card)

- Live or uploaded image with a detection-dots layer.
- **Face guide** (live only): dashed oval plus dashed centre lines.
- **Four corner brackets** (viewfinder).
- **Top banner:** scan state, e.g. "Stable - Capturing".
- **Bottom-centre banner:** positioning instruction in large text, plus a hold-still progress bar.
- **Bottom-left chip:** live service / camera status.
- **HEAT MAP legend** (top right): Acne, Hyperpigmentation, Eczema, Normal; "Colour = category / Strength = how much it counted".
- **Zoom pill** (right): +, level readout (e.g. 1.0x), -, reset. Pinch and mouse wheel also work.
- **Placeholder:** camera icon, "Ready when you are", "Start the live camera, or upload a photograph to evaluate."

B. Middle column: CAPTURE / "Three-angle scan"

- **Gate box:** consent/patient warning with **Go to Consent**.
- **Save-failed box** (red) with **Retry save**.
- **Image review panel:** per-view quality list and **Accept views and view results**.
- **Live Cam**, **Snap Now**, **File Upload** buttons.
- **STAGES stepper:** "Straight on", "Left cheek", "Right cheek"; a step shows "Now: ..." while active and "Captured" with a check when done.
- **Options (3 checkboxes):** take photo automatically when steady; three photographs (front, left, right); show centre lines.
- **Camera box:** Camera dropdown and Picture size dropdown.
- **New Scan** and **Analyse uploaded image (researcher)** buttons.

C. Right column: AI ANALYSIS / "Live reading"

- **Status panel:** "Prediction stability" badge (ANALYZING...) and seven live checks: Face position, Pose / orientation, Sharpness, Brightness / exposure, Motion, Stability, Camera.
- **Model class scores:** four bars (Acne, Hyperpigmentation, Eczema, Normal) with percentages. Note: scores are mutually exclusive, not independent disease probabilities.
- **Result callout:** pulse icon, "Status: Awaiting camera / image", region line.
- **Disclaimer:** "Screening aid only. Not a medical diagnosis..."
- **More options** expander: Researcher view checkbox revealing Heat-map controls (Live Grad-CAM++ ON, Overlay opacity slider, metrics readout) and buttons Capture details / review, Comparison gallery, Pending reviews.
- **View results** and **Create report** buttons (disabled until the scan is saved).

9. Results

Title "Results - scan id" with a subtitle of patient, date, model, status. Two columns.

Main column

- **Overall result:** "The scan most resembles: Class" in the class color with match strength; four score bars; "Photographs analysed" pills for Front / Left / Right; agreement callout.
- **Reading of each photograph:** toggle Original / Heat map / Marked areas / Both; per view: thumbnail, class headline, explanation, next-closest class, mini score bars, photo quality, heat-map and marked-areas status lines.

Side column

- **NEXT STEPS:** REVIEW (Add researcher notes, Dermatologist review, Compare photographs and heat maps); SHARE (Create report); GO TO (Patient record, New scan for this patient, Back to home).
- **Clinical review** card: Researcher and Dermatologist status. **Research prototype** notice.

10. Patient records

- **Search card:** "Search by patient ID or name", text box, Search button.
- **Left sidebar "Browse patients":** filter box, registration-date picker, status dropdown (All / Active / Withdrawn / Completed), count line, patient list; buttons Scans waiting for review, Scans without a patient, Find saved scans, Register new patient.
- **Right panel:** Latest scan (View results); Patient information (Edit, New scan, Record consent again); Skin profile; Scan history table (Scan, Date and time, Overall result, Match, Photos, Status, Review); Selected scan details with buttons Results, Dermatologist review, Researcher notes, Report; evidence tabs Original / Heat map / Marked areas / Both.
- **Special views:** "Patient not found" with Register button; "Scans waiting for review"; "Scans without a patient" with an Assign to patient field.

11. Research dashboard

Title, Refresh button, note "Every number below is counted from the stored database."

Stat cards (4 per row)	Total participants; Total scan sessions; Captured images; Grad-CAM++ maps; Completed analyses; Pending researcher verification; Pending dermatologist validation; Model versions seen; Scans with consent for future model use; Withdrawn participants.
Charts (2 per row)	AI classification distribution; Researcher reference distribution; Dermatologist reference distribution; AI vs researcher agreement; AI vs dermatologist agreement; View completion rate; Age distribution; Sex distribution; Model-version distribution.

12. Model information

- **Skin-condition model:** MobileNetV2 classifier details, collapsible "Technical details".
- **Lesion detectors:** one block per condition, Ready / Not installed, YOLOv8 type, picture size, threshold.
- **Heat-map service:** status, what it does, what happens if it is down.
- **Face and angle models:** YuNet face detector, Haar face finder.
- **Model history:** every version seen, "(in use now)" marks the current one.

13. Settings

Four tabs, with a footer: **Restore defaults**, status text, **Save settings**.

Tab	Contents
Camera	Camera choice, Sharpest picture, Picture width/height, Smallest/Largest zoom, Show zoom buttons, Always show on-screen keyboard.
Capture	Automatic capture, Review before results, Steady frames, Hold-still time, Pause between photographs, Min sharpness, Min / Max brightness.
Accounts	Account list, Change my password, Add an account.
Change history	Last 25 settings changes with date, time and person.

14. Pop-up windows and dialogs

Window	Contents
LUMYVUE dialog	Rounded white card with icon (error, warning, question, info), message, large buttons; screen dims behind.
Choose a patient	"SKIN ANALYSIS" eyebrow, search box + Search, results with status pill, "Selected:" summary, Register new patient, Continue.

Window	Contents
About LUMYVUE	Banner; What LUMYVUE does (Capture, Analyse, Review); How to read the results; Important to know; model note; Close.
Researcher Verification	AI prediction (read-only) on the left; tabs on the right: Researcher assessment, Dermatologist validation, History.
Dermatologist review	Patient information, scan summary, reading of each photograph, captured views, "Licensed Dermatologist Assessment" form, Save dermatologist assessment.
Comparison gallery	Summary tab and per-view tabs comparing original vs Grad-CAM++, Technical details, Close.
Capture Review (Researcher)	Analysed frame, class overlays, scores, details, Researcher review form (label, reviewer, comment, Save review), Previous / Next pending, Open folder, Comparison gallery, Close.
Report / Print Preview	A4 page: header, team names, patient block, face image, four score bars, primary status, next steps, disclaimer, signature line; button Confirm & Print PDF Report (choose Microsoft Print to PDF to save).
Old report log	Read-only legacy table with three summary cards and a "No old reports" empty state.
